DENMARK
SYSTEM

Introducing the Trolla System – Much more than a yard rake

The Trolla System transforms your ordinary garden tractor into your private outdoor Swiss-army-knife, with a host of different applications for multiple tasks.

From a beautifully reefed courtyard, fertilizing your lawn or even keeping weeds at bay, the Trolla System will help you complete your garden tasks with ease end efficiency.

At the heart of the Trolla System is the ease of use and storage when not in use. Individual tools are easily exchanged without the use of tools stored or remounted.

With the optional tow ball solution, you will also have a multitude of towed applications, from our standard dump cart and spreaders to lawn roller and graders. With the Trolla System, you will get a complete tool-box for all your garden needs.

Trolla offers different shop solutions that present the products in the best way.

About SUPERROOF

SUPERROOF is a leading provider of canopies in Europe, with quality and design at competitive prices.

Superroof offers a wide range of different models and materials, as well as sizes. The products vary in terms of appearance that allows the end-user to find the model/size that fits its house expression.

DIY DROPSHIPMENT
Superroof offers a large part of its range in full printed DIY boxes with explanations, drawings, language, pictures etc. This means that the end-user is now tempted and can carri the canopy in ther car in sizes up to 1900 mm.

The products are CE approved and the products are calculated according to EU requirements to snow and wind load.

In addition, we have BSCI on all our superroof products.

With our customers we provide shopsolutions, POS, flyers, canopies displays, catalogues etc. Superroof is a total solution within shelter.

SUPERROOF

SMARTFENCE

Smart fence

www.bcom.dk

SMARTFENCE

The system is developed around our unique fence post in extruded aluminum. The unique profile provides maximum flexibility, while maintaining a beautiful and stylish design, without visible fittings and screws. The post is built as a "T" with universal connection from 3 sides. The track in the post allows to use many different types of fences - glass, wood, fiber concrete to name a few. The post is powder coated and maintenance free so you can drop brush and enjoy the garden and the sun instead.

SMART POST

SMART POST from SUPERROOF SMART FENCE is a universal fence post which can be used for 6 mm toughened glass, wood/WPC in thicknesses 15–16 mm and 20–22 mm. The post is shaped like a T and one to three sides can be connected to a single post. A side cover is included to cover unused tracks. Spacers are also included for the glass panels and/or wood. Top and bottom mounting strips are also available for many modules. You find the post in 95 and 125 cm with ground plate for mounting and 230 cm for embedding the post(180 cm over ground)

Aluminium rail

Aluminium mounting strips for your SUPERROOF SMART FENCE. Finish top and bottom with this black aluminium moulding. It has a built-in track which fits the glass panels or a tongue and groove in the wood/WPC board. It can also be used for flat profiled wood, for a highlighted black edge. The track is 6 mm wide and the mounting strip is 87.3 mm long.

ALUMINIUM RAIL
Aluminium - BLACK
10174

Rubber strip for 16 mm

Rubber strip for SUPERROOF SMART POST. The rubber moulding strip is pushed into the post track, after which it is possible to insert a series of 15–16 mm boards without any problem. This is used for 15-16 mm wood/WPC.
